NEW FEATURE HIGHLIGHTS

The following is a summary of what Pixami customers can expect in the new release of Pixami Yearbook Pro. The features and enhancements in this new version are a direct result of feedback and suggestions from our customers and their schools. We take this input to heart, and find it invaluable in our ongoing efforts to address the current and future needs in the yearbook market!

School Fundraising Program

This is a new turnkey solution for online sales of yearbooks and ads, plus a variety of printed products including personalized yearbook pages and supplements, photobooks, calendars, cards and announcements, mugs and water bottles, wall art, blankets, tapestries, pillows and more! Products are ordered through Pixami's School Storefront software and delivered directly to the user at home. Pixami manages the e-commerce and reporting, and provides ship-to-home fulfillment, plus a set of sales and marketing materials. There is no cost for the program for licensees of Pixami Yearbook Pro.

- The Fundraising Program is an easy way to substantially increase your revenue, while giving your schools an excellent opportunity!
- Pixami can also handle e-commerce for your yearbook pre-orders.
- Customers can handle their own e-commerce or product fulfillment.

Updated Page Numbering

This feature allows page numbers to be viewed on the editor. Page numbers can be moved into a different position and the color can be modified.

Progress Dashboard

This new feature provides information on overall progress including the book submission deadline, percent (%) complete and an activity log.

NEW FEATURE HIGHLIGHTS

Enhanced Theme Wizard
The Theme Wizard used to create new sections now includes a set of 25 completely designed 10-page theme sets. Each new theme includes matched layouts, backgrounds and movable design elements, and built-in text titles.

Combined Manage Sections and Edit Sections
The Manage Section and Edit Section pages have been combined into a single page to simplify the overall workflow. Roles control the specific functionality available for each user.

Enhanced Proofing Process
Enhancement to the new proofing feature includes options for an online or a press proof, with managed user acceptance and proof tracking.

Simplified School Affiliate Creation
The Add Affiliate feature for adding new schools has been simplified. It now provides the option to email the Adviser automatically with their login information.

More Control Over Emails
A new feature in Administration allows control over who gets various notificaiton emails from the software.

Simplified Administration
The Administration pages have been reworked with several modifications to simplify the overall administration of the software. Advanced Administration features can be enabled for special cases where certain functionality is required.

HOW TO CREATE GREAT DESIGNS

It's easy and fun to create your own unique and exciting designs in Pixami Yearbook Pro. With our extensive collection of Layouts, Backgrounds, Clip Art, Design Elements and Fonts, you can put them all together to create great and cohesive designs, no matter what age group. Here are some tips how.

Both of these respective designs use layering, or placing text on top of elements, as well as elements behind others. This creates depth and makes pages more dynamic.

Simply drag an element or a piece of clip art onto your page. Add a text frame on top and enter some text. To control the positioning of an item, simply click on it, select the > button and then you can either bring it forward (in front of), bring to front (top), send backward (behind), or send to back (behind everything).

Using effects on images can make them more interesting. To add an effect to an image, select the image and click on the magic wand icon. Here you can select effects like Gray and Sepia, Cartoon and Posterize filters, borders and frames.
